

## Backcountry Camping on the Pine Mountain Trail in FDR State Park

FDR State

By signing your backcountry permit, **you** as permit holder are agreeing to follow Park and GA State parks/DNR rules and camp along the trail accordingly. As permit holder you are responsible for passing along these rules to those camping with you and for their actions at the campsite. Backpackers are to camp in the designated named campsite backcountry site (s) they have a permit for and if a two fire-ring site, the lettered side they have permit for. All campsites have a named wooden sign at the access trail entrance of them. Camp/set up tents, near existing fire-rings (near meaning within 50' in most cases.) Most campsites have RED signs on perimeters reading "Don't camp beyond this sign". If you cut your trip short and not stay at a camp, CALL the park office and let a clerk know. You cannot camp at a site section not on your permit, nor change sites, unless you call and get ok to do so from the park office clerks or park managers. **You have a permit for a backcountry site, meaning be prepared to carry in & out in/on your backpack, everything you bring! NO wheeled anything allowed on trails including carts, wagons, wheeled coolers nor strollers.** \*\*See IMPORTANT NOTICE below....

If building a campfire (when allowed) use existing fire-rings. **Do not build a new one, move one/ add to or move/rearrange rocks around them.** Use only dead, downed wood for campfires. No cutting of or on any standing trees/bushes of any size dead or living. **Axes, large knives (any size sheath knife) nor machetes are NOT allowed in the park (nothing bladed larger than a pocket knife or pocket multi-tool.)** You may use a small hand saw to saw up dead-downed wood. NOTE: there are NO campfires allowed at Sassafras Hill Campsite in warmer/dry months (unless told otherwise by FDR clerks), and due to limited water, not suggested at Whiskey Still Campsite. Bumble Bee Ridge Campsite is also a WAYS from water, so be prepared to haul water a ways (several hundred yards) up the steep trail/hill to that site. **Do not use/bring charcoal or "Fire Logs".** Do NOT burn cans-aluminum foil (or food packets with foil liners)-glass-wax candles or plastic in campfires. Burn only paper items totally. All trash must be taken out and disposed of at your home. Before you leave a camp, campfires need to be "drowned" with several gallons of water, stirred and then drowned again till no steam appears. Have a fire at night but not in morning? **Drown the fire-ring in the morning anyway** (coals under ashes not drowned are likely still hot and can stay that way for a couple of days.) **DON'T pile rocks in on a fire-ring, move or add to a fire ring.** Do not build any structures (ie: lean-to, tables, tripods etc) or leave anything man made at a campsite. Look around camp before you leave it, for every speck of trash (including cord tied on trees.). **Fluff up the leaves** where you put your tents/hammocks. This fluffing helps the area from becoming compacted. Main thing, leave a campsite in better shape than you found it.

NOTE: If upon arrival at a campsite you find trash in the camp or fire smoldering/hot...CALL the park office/manager right away (take photos and text those to manager upon request.) Use the emergency phone number on the back of your trail map) Take all trash you make (and if you find some left by previous campers) with you..

**\*\*IMPORTANT NOTICE: Campsite areas are checked regularly.**

If a camp is found with trash or abandoned equipment, a smoldering fire, trees hacked on or cut down, **permit holder staying at a camp last, can receive a citation for actions. Citations generally run over \$140.00 per code section violations-** Citations for leaving a fire or trash/abandoned gear at a PMT backcountry campsite are based on Georgia DNR code sections: 16-7-43- It shall be unlawful for any person or persons to dump, deposit, throw, or leave or to cause or permit the dumping, depositing, placing, throwing, or leaving of litter on any public or private property in this state or any waters in this state. 391-5-1-.04 (1) (a) 8- Ignite or attempt to ignite any fire except in places provided or designated for such purposes, under the continuous care and direction of a responsible person. All fires, matches, and smoldering material must be completely extinguished after use. During periods of high fire danger, the site (park) manager may close all or a portion of a site to lighting or maintaining fires.

**Alcoholic beverages** of any type are **NOT** allowed in FDR State Park along the trails (including backcountry campsites) nor at roadside and trailhead picnic areas.

Backcountry camping/building a campfire where allowed are a privilege. Help by doing the right things all the time. READ the PMT map (especially the back FAQ section) and sections on the PMTA website about Backpacking, Frequently Asked Questions, Site Description, Trail Description for other rules/guidelines and information.....

Please report any blown-down trees or trail situations along the trail, to the FDR Park Office or email the Pine Mountain Trail Association at [www.pinemountaintrail.org](http://www.pinemountaintrail.org) or text photos and locations to 706-325-4113. The Pine Mountain Trail was built by and is maintained only by volunteers of the Pine Mountain Trail Association. A Pine Mountain Trail trash bag will be given to every backcountry permit holder ....for free.....
